ABSTRACT

[0245] 20

21 An apparatus and method utilizing a network based interactive computer system  
22 for project management. Information modules are provided and accessible by authorized  
23 project team members to assign tasks, prepare documents, request collaboration for  
24 information and issue resolution. Smart electronic mail notifications are provided to  
25 enable quick response to notifications with the ability to attach documents. Each user can  
26 establish a personal portal defining the manner and which notifications relating to the  
project which each user will receive.
